01. Vision

As VEF Marine Survey & Consultancy, we aim to be one of the leading survey companies in the maritime sector by ensuring continuity in being the first choice of Customers with our trustworthy and prompt service quality in contribution with our maritime knowledge and experience.

02. Mission

As VEF Marine Survey & Consultancy, our first mission is to provide well-qualified service to our customers in a prompt and trustworthy way. In order to ensure the continuity of service, the main principles of our company, which serves on the international platform, are independence, impartiality, by operating in honesty and confidentiality while providing a wide range of survey services of guaranteed high quality combined with traditionally affordable prices and flexible conditions to the clients in full accordance with the requirements and expectations of the Customer, following-up in the sector.

ABOUT US

VEF Marine Survey & Consultancy is a specialized and well-qualified marine survey company.

The company provides survey services at all Turkish ports and at some of the ports of neighbor countries. The company is completely independent in its activities.

Survey services provided by VEF Marine & Consultancy have a wide range, including but not limited to: condition survey of vessels, draft survey, determining the amount of fuel rob (bunker survey), condition of holds and hatch covers as well as UT test of the hatch covers, inspection for determination of the quantity and quality of the cargo during loading and unloading operations, control of reloading, determination of damages to the cargo and/or vessels and other third parties, etc.

VEF Marine Survey & Consultancy is a member of the Turkish Chamber of Shipping and Industry.

The company offers a wide range of survey services of guaranteed high quality combined with traditionally affordable prices and flexible conditions. The policy of our company is to provide services in full accordance with the requirements and expectations of the Customer.

Pollution investigations
Crew claims
Medical Investigations

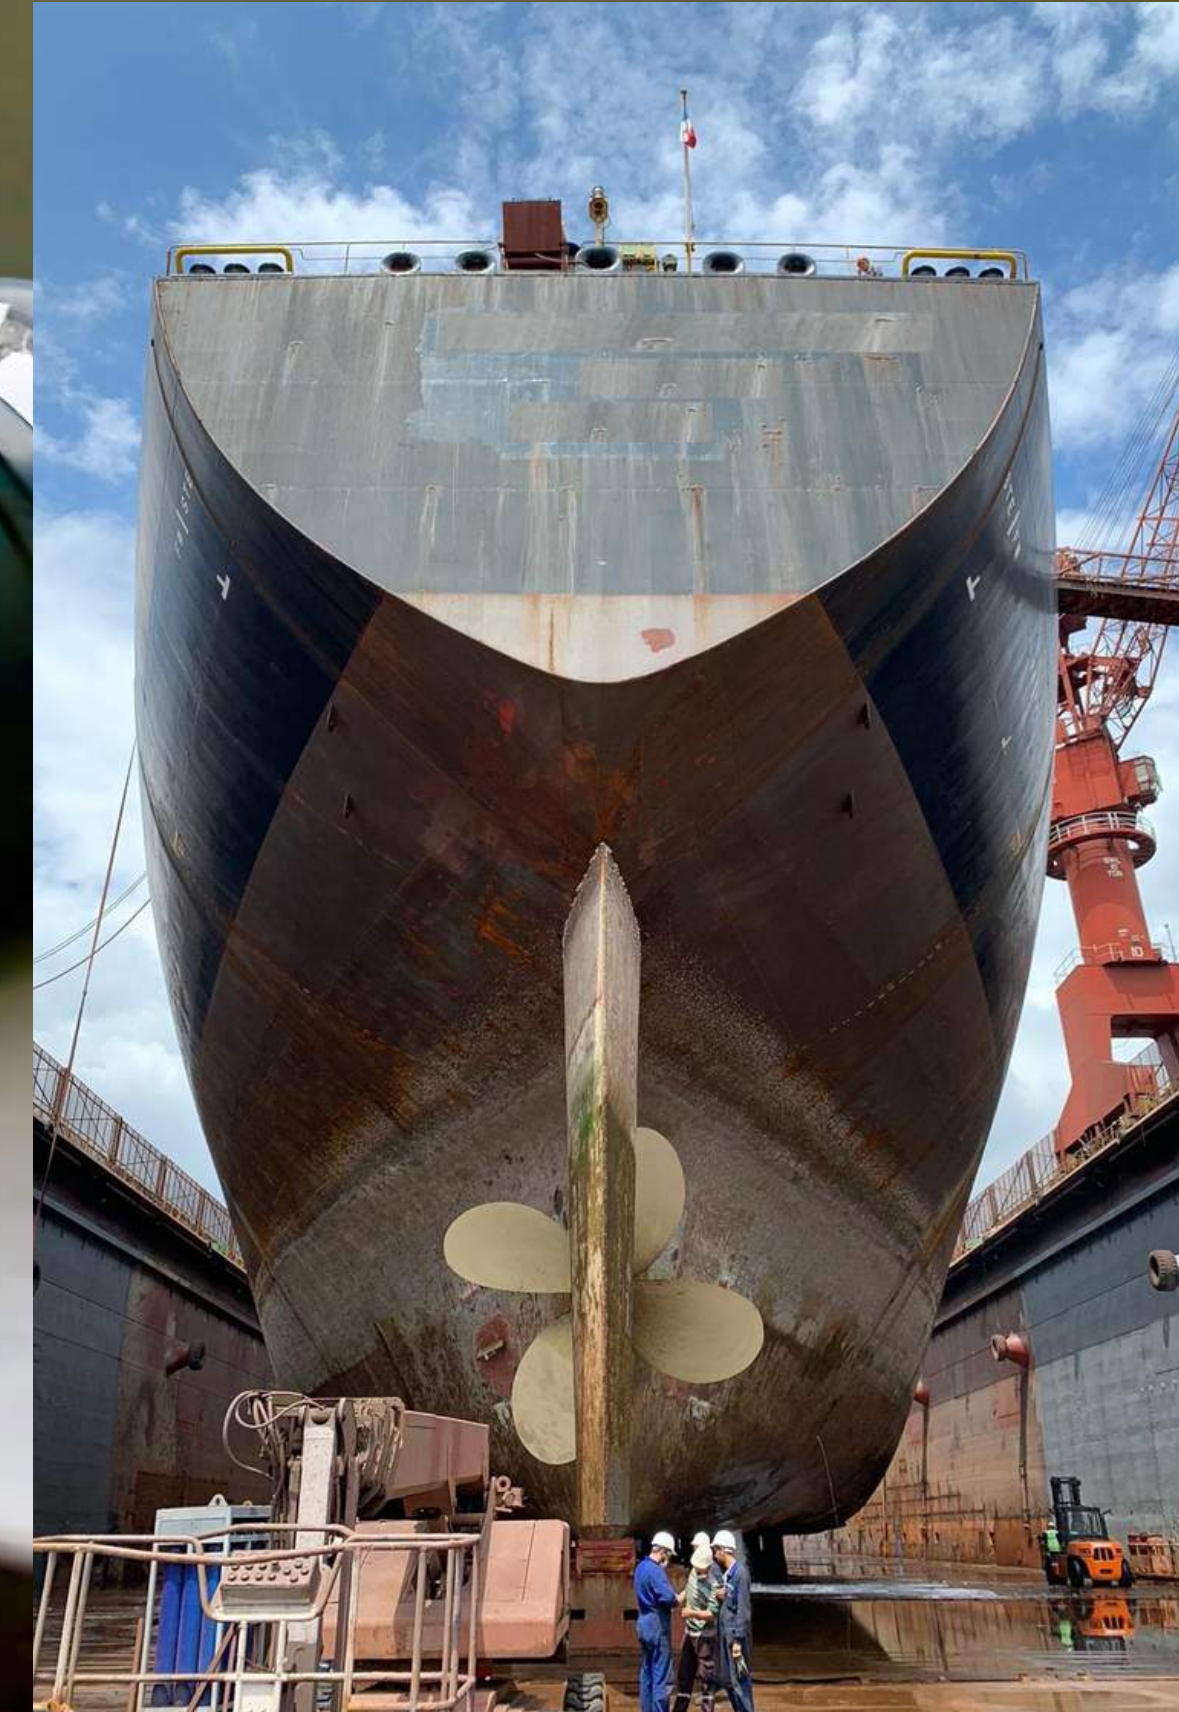

CARGO CONDITION SURVEYS

The cargo condition surveys are the first step of the shipment on loading or discharging operations and designed to protect Owners / Charterers from cargo claims which may have occurred prior to operation on board the vessel as well as the damages during the loading and discharging regarding the cargo condition.

VESSEL CONDITION SURVEYS

The main purpose of this inspection is to ensure the seaworthiness of the vessel, its hull and its components (decks, liners, partitions, crimps, etc.) retain their integrity and strength sufficient to successfully confront the forces encountered by the vessel at sea , and, secondly, that the tightness of the ease and closures of all kinds of slots (hatches, entrances, fans, pipelines, scuppers, etc.) is insured, i.e the buoyancy of the vessel is provided. This check allows you to ensure that the state of seaworthiness will ensure safety at sea away from the ship, people and the environment.

DAMAGE SURVEYS

We perform damages surveys caused to vessels that consist of the determination of the origin, investigation of the causes and extent of the damage caused to the ship hull or machinery, collisions with marine and coastal facilities, calculation of the costs and the follow up the repairs.

In such surveys, we are appointed by Hull & Machinery Underwriters and/or Protection and Indemnity (P&I) Clubs.

- Hull and Machinery Underwriters Damage Survey
- P&I damage Survey
- Collisions
- Monitoring the repair works
- Damage to Port facilities.
- Grounding and re-floating, salvage surveys
